

Your Cybersecurity Guardian

Ethical Hack Bot is an integrated platform using robotics technology to automate and strengthen your threat and vulnerability management process

Significant savings on operational costs and time

Before

Your teams spend a lot of time on manual scanning and preparing vulnerability reports

After

Increase efficiency with fully automatic scanning and reporting, no additional man hours

Seamless workflow and improved accuracy to combat continuous cyber attacks

Before

Your workflows are manual and causing human errors

After

Accelerate vulnerability assessment process, enhance team collaboration

One stop shop security service

Before

Your teams run varied scanners separately for different cyber attacks

After

Integrate with multiple scanning tools seamlessly, able to manage multi cyber attacks

Drive actions for relevant stakeholders

Before

Your assets of various places are at risk, access controls are hard to manage

After

Track instant security level anytime and anywhere, easily manage systematic authorisation

Ethical Hack Bot will boost your cyber resilience with
